

**Business Opportunity for Tolling of Copper Material
into copper cathode
At
Jhagadia Copper Limited**

Introduction

Jhagadia Copper Limited is the largest recycling unit in India for Copper materials. The Copper smelter cum refinery has annual capacity of 50,000MT of cathodes confirming to LME Grade 'A'.

The smelter technology is based on technical know-how from Outotec, Sweden (formerly known as Boliden Contech, Sweden). The refinery is designed on ISA technology from MIM, Australia.

Expression of Interest

Presently Jhagadia Copper is using 30% of production capacity. To augment capacity; JCL invites expression of interest from parties who are interested for conversion of copper raw/scrap material into copper cathodes of quality confirming to LME Grade 'A'.

Parties interested in such conversion may please contact at following address:
